## LIVING BROOKLYN NEWSLETTER 1 DECEMBER 2013

The Living Victoria Fund is a \$50 million fund for urban water cycle systems reform in Melbourne and regional cities. Brimbank City Council has been awarded \$405,320 through the fund to prepare an Integrated Water Cycle Management (IWCM) Strategy for Brooklyn Industrial Estate. This project, Living Brooklyn, is a solutions focused project that aims to use water as the catalyst to improve the health and prosperity of Brooklyn. You can be a part of the solution by engaging with the project. Read on to find out how.

Livingvictoria.vic.gov.au/mwf

Melbourne's Water Future Draft Strategy is a new innovative approach to water planning. The intention of the strategy is to create an integrated or whole-of-water-cycle approach to water that will:

- Secure safe and plentiful water supply
- Manage our storm water runoff
- Manage our waste water discharge
- Reduce flooding
- Keep our parks and gardens green
- Improve our waterways

Health and liveability are key objectives in Melbourne's Water Future and will be central to the goals pursued through Living Brooklyn.

*Living Brooklyn is a solutions focused project that will use a collaborative approach to guide change.*

Integrated Water Cycle Management depends on people working together in the pursuit of sustainable water cycle services for healthy, economically prosperous communities. Living Brooklyn will bring to the table the stakeholders who use, influence or are affected by aspects of the water cycle at Brooklyn Industrial Estate to collaborate on a Vision for a healthier, more prosperous future. This group will form a Leadership Team (or Steering Committee). Businesses that choose to join the Leadership Team will assist in the creation of a vision for Brooklyn Industrial Estate's future health and prosperity. The current list of Leadership Team members are outlined on the rear of this Newsletter.

Precedent Project

Brooklyn Industrial Estate today

SCIP was a polluted industrial park transformed with water to include conservation, education and sustainable development

Brooklyn.....???

collaboration

Living Brooklyn Project invites business owners/ operators at Brooklyn Industrial Estate to join the Leadership Team and guide Living Brooklyn through the stages outlined below. The first step is to create a vision for a healthier, more prosperous future using water as the catalyst for change.

### Head: Leadership Team

- |                                 |                                       |
|---------------------------------|---------------------------------------|
| Industrialists/ Business Owners | Victoria University                   |
| Hobson's Bay Council            | City West Water                       |
| Maribyrnong Council             | Melbourne Water                       |
| Wyndham Council                 | Southern Rural Water                  |
| Brimbank City Council           | EPA                                   |
| Vicroads                        | Department of Health                  |
| Lead West                       | Department of Business and Innovation |
| Community Rep.                  | WAGA                                  |
| Office of Living Victoria (OLV) |                                       |

### Body: Project Control Group

- City West Water  
Brimbank City Council including:
- |                         |  |
|-------------------------|--|
| Strategic Planning      | Engineering                                  |
| Urban Design            | Public Health/Well being                     |
| Landscape Architecture  | Economic Development                         |
