# Year in Review: 2013- 2014

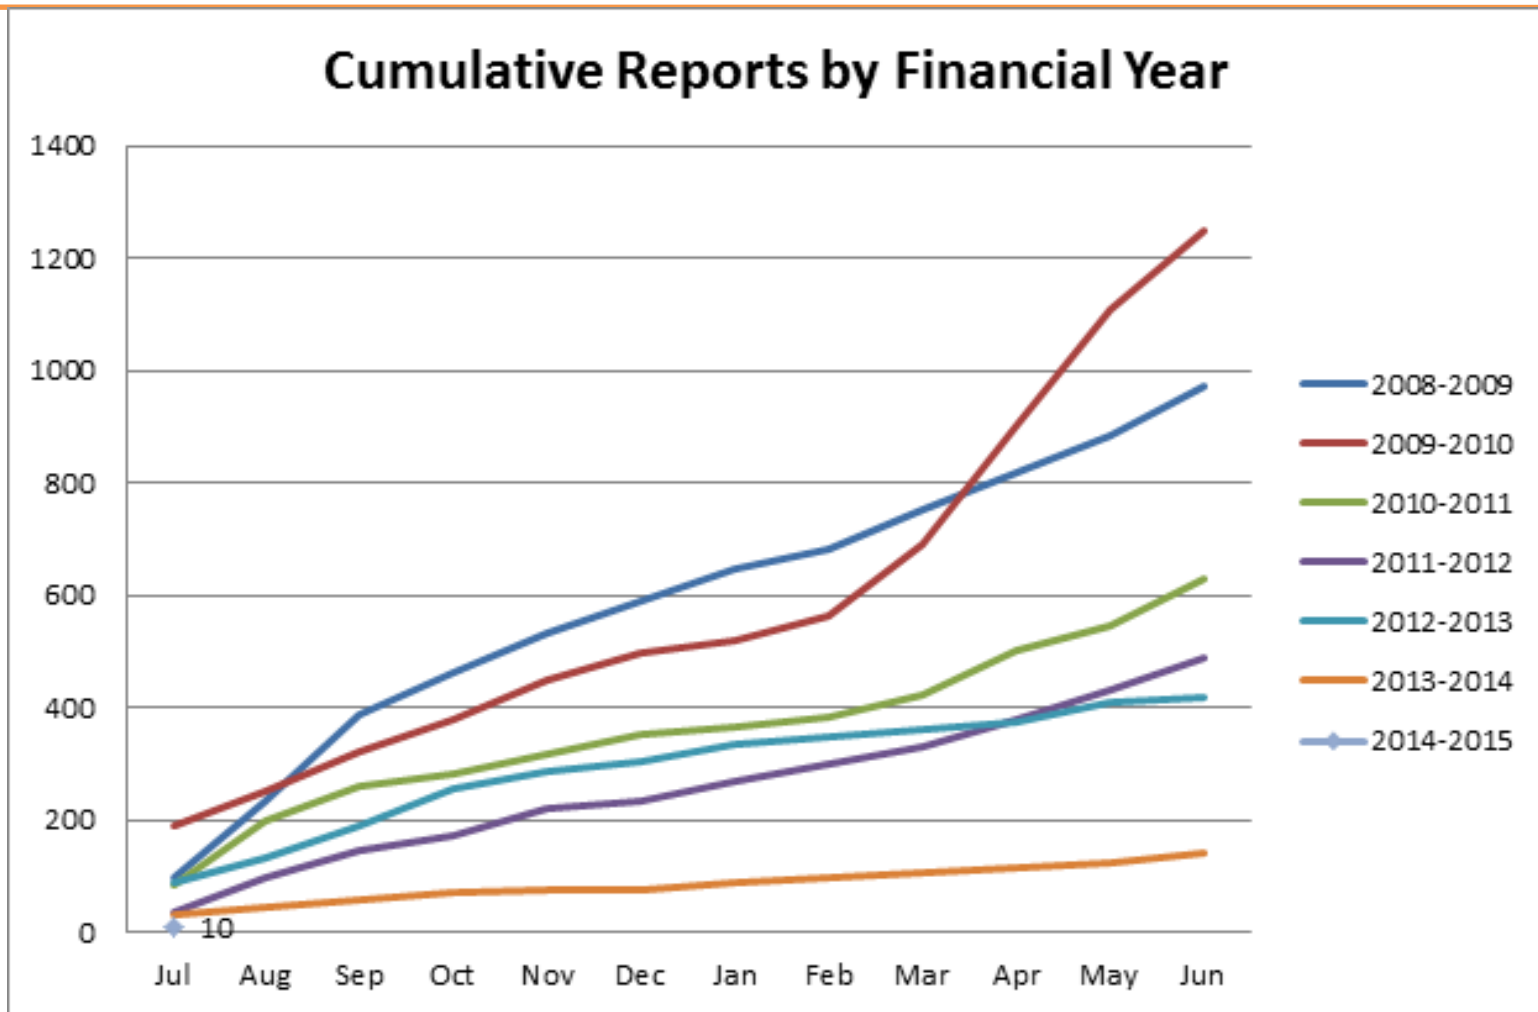

---

- Over 100 inspections
- Lowest odour on record
- Verge works completed
- Sites coming into compliance
- New notices

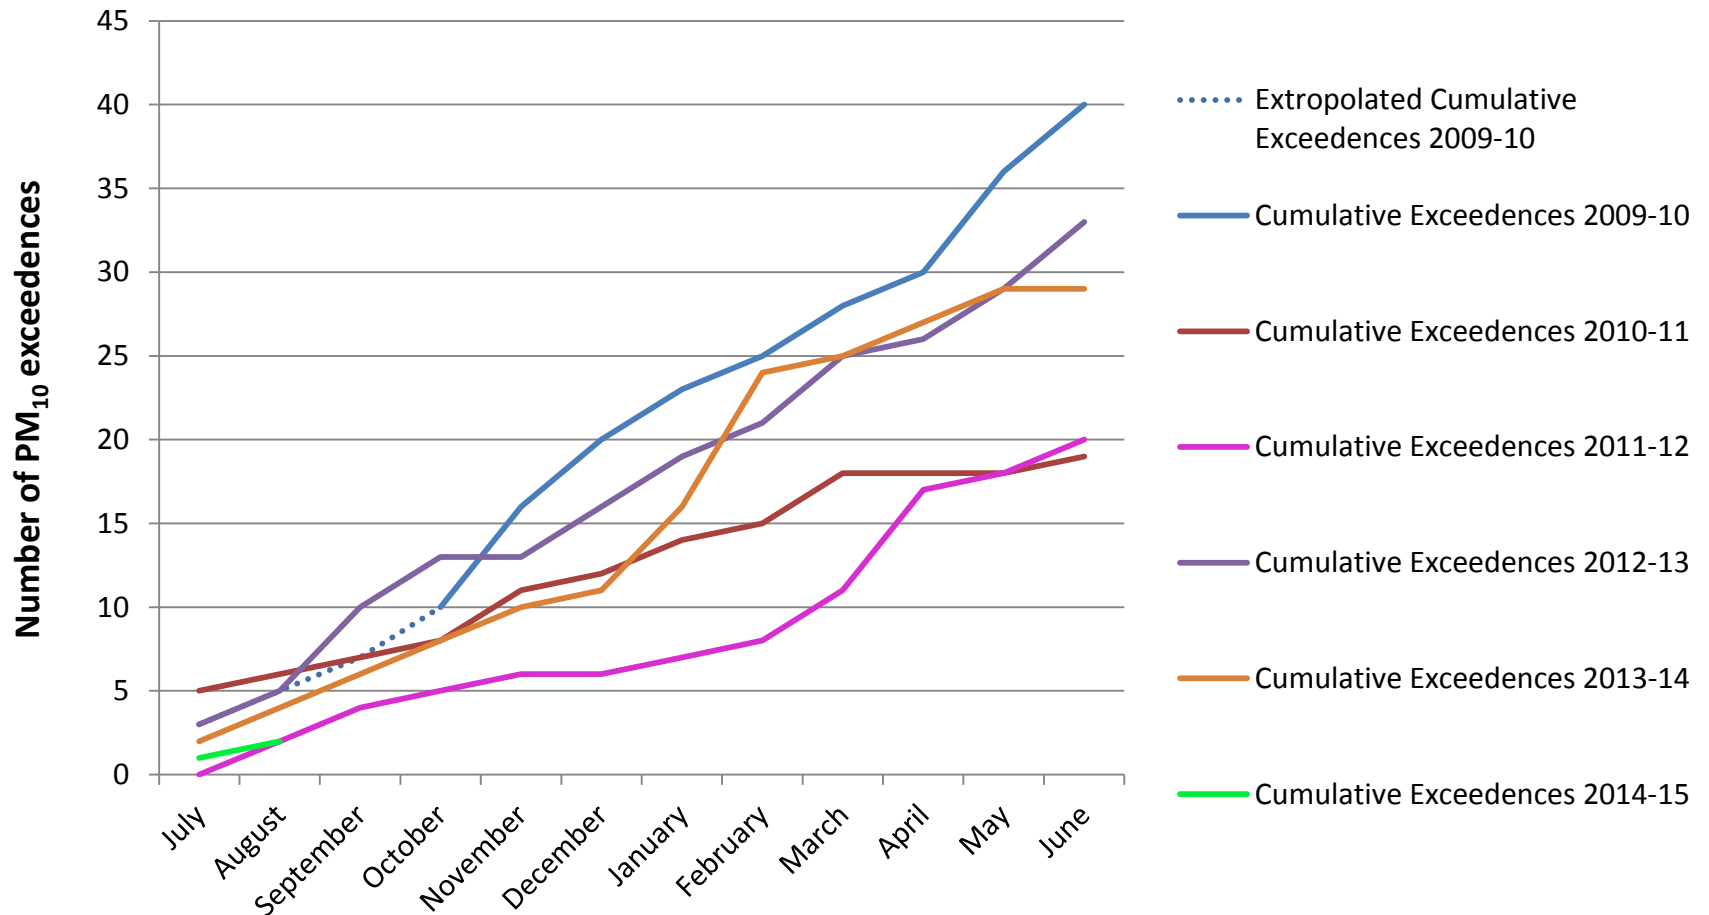

- Dust
- Emergency
- Fire
- Groundwater
- Illegal Dumping

# Odour update

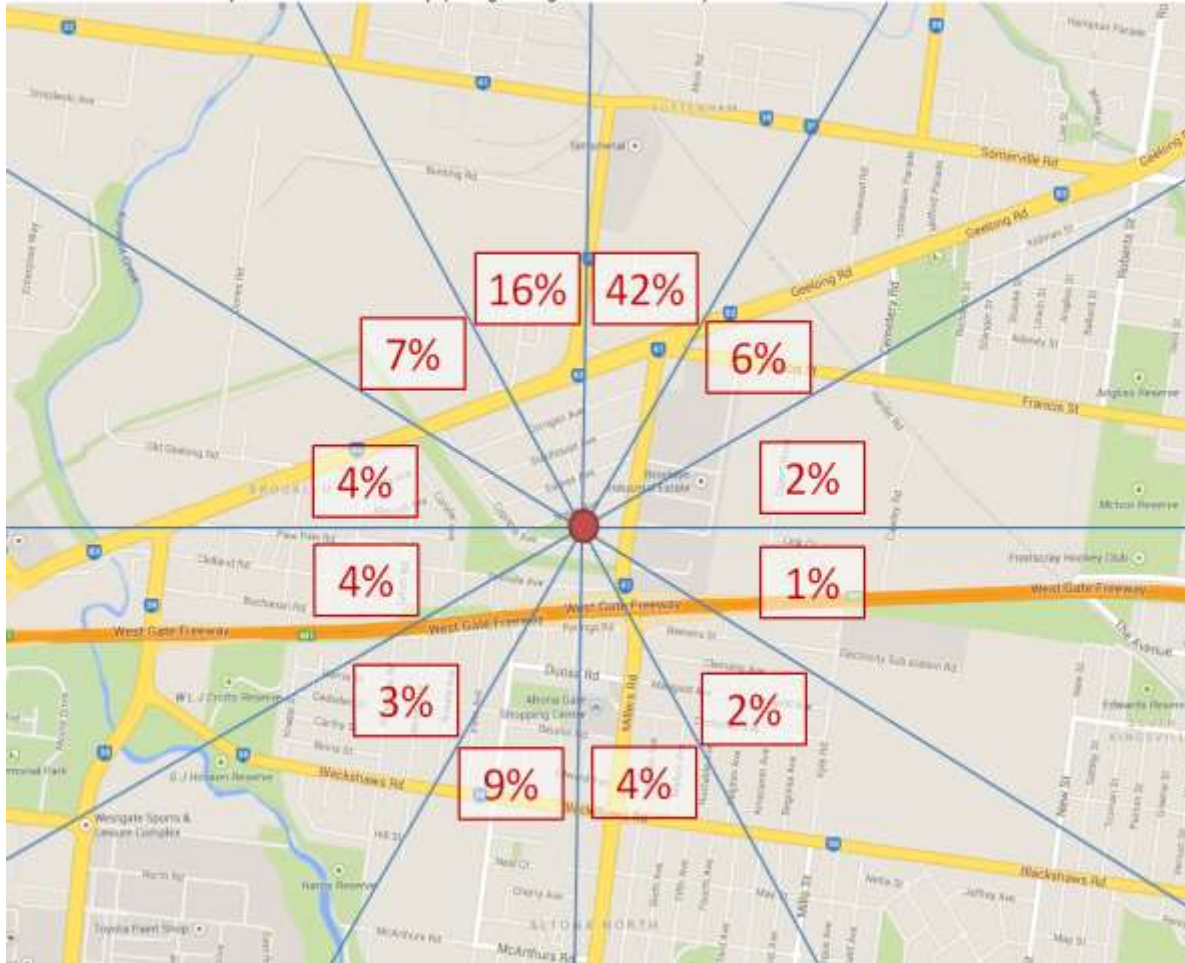

# Air Quality Update

# Where the dust is coming from

% PM10 contribution in Brooklyn on PM10 exceedance days (average during 2013 and 2014 so far)

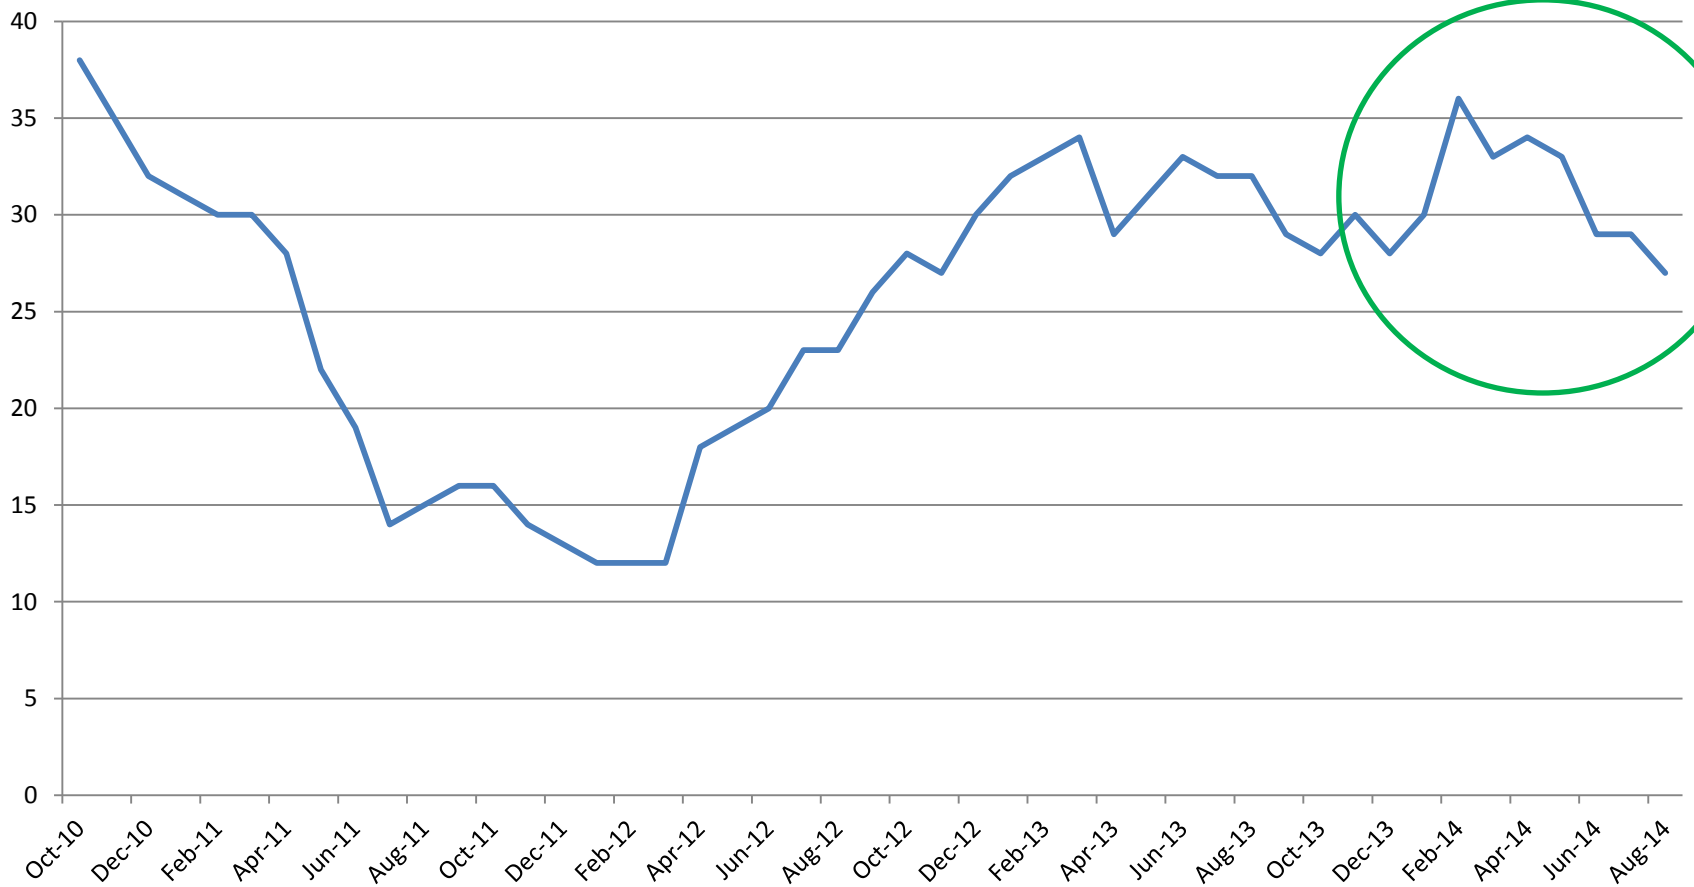

# Air Pollution Trends

---

- We are converting fewer potential exceedence days
- Only 7 exceedences since March 1.
- But we are mainly holding gains rather than improving
- Roads are still a big problem.

# Air Pollution Trends

Rolling 12 month exceedence count

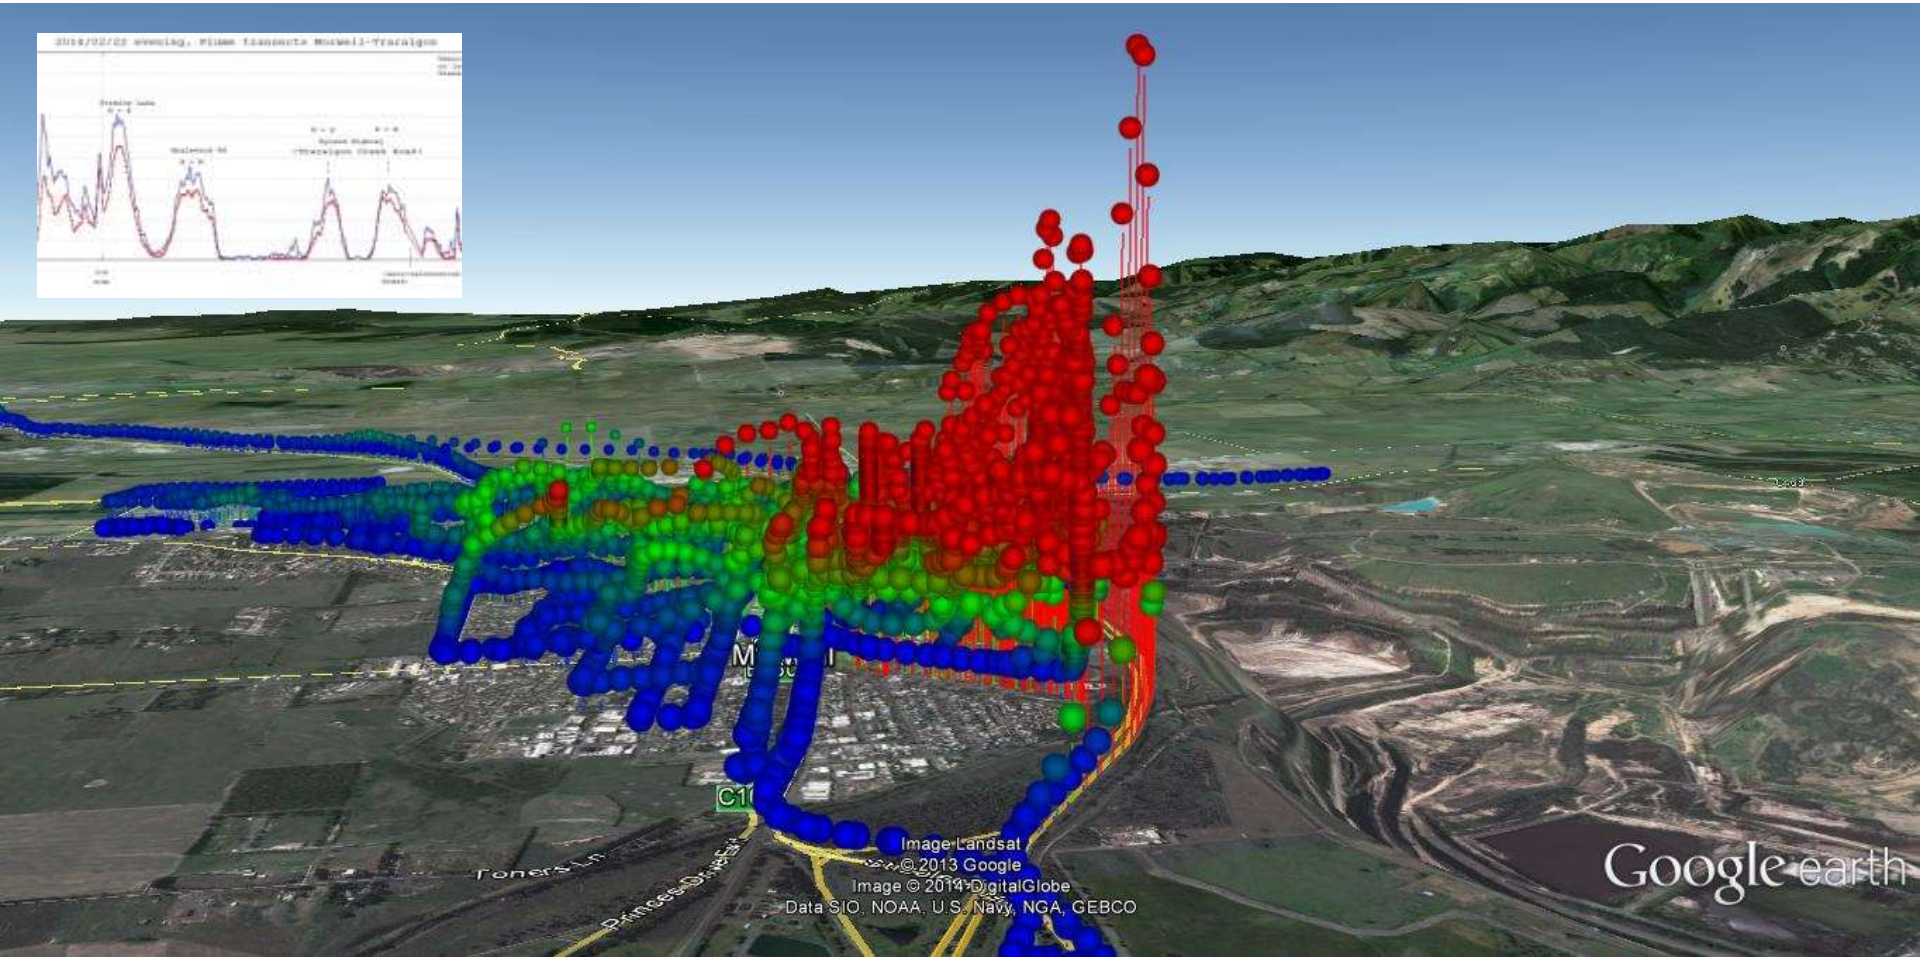

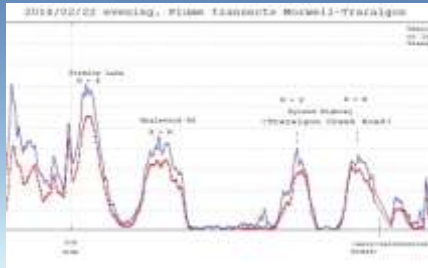

# Progress: Priority 1 (Roads)

---

- Verges work
  - Works to remove build up of soil.
  - Verges seeded, or crushed rock applied
  - Vehicles driving and parking on newly treated areas is a problem
- Alternative roads modelling
  - VCAT decision has halted works on Jones and Bunting Roads
  - EPA has modelled alternatives to sealing both roads

# Upcoming Activities

# Progress: Priority 2 (Industrial Sites)

---

- 27 Companies Currently Have Notices
- 5 Enforcement Actions Commenced
- 27 Notices Have Been revoked:
  - Change of occupier
  - Occupier has left site
  - Occupier has complied with notice
- 16 New Notices Issued
  - New Occupier of existing site
  - New sites identified
  - New notices on sites that have new issues.

# Brooklyn Dust Activity
