

Brooklyn Community Representative Group information update

ENVIRONMENT PROTECTION AUTHORITY

Welcome

The Brooklyn Industrial Precinct and surrounding residential areas have been a strategic priority for EPA since 2008.

Whilst there have been significant gains in the overall environmental quality in Brooklyn, the air quality still remains the worst experienced in Victoria.

As a modern regulator EPA does not protect the environment on its own. Businesses, other government organisations and the community all have role to play.

EPA remains committed to improving the environment in Brooklyn.

Nial Finegan, CEO
Environment Protection
Authority

EPA Vision For Brooklyn

Brooklyn Industrial Precinct is a place where business and community work co-operatively to ensure the **environment is protected** and **air emissions** (odour and dust) **do not adversely affect community health and amenity.**

Industries operating in the Brooklyn Industrial Precinct will **understand** and **meet** all their **environmental obligations.**

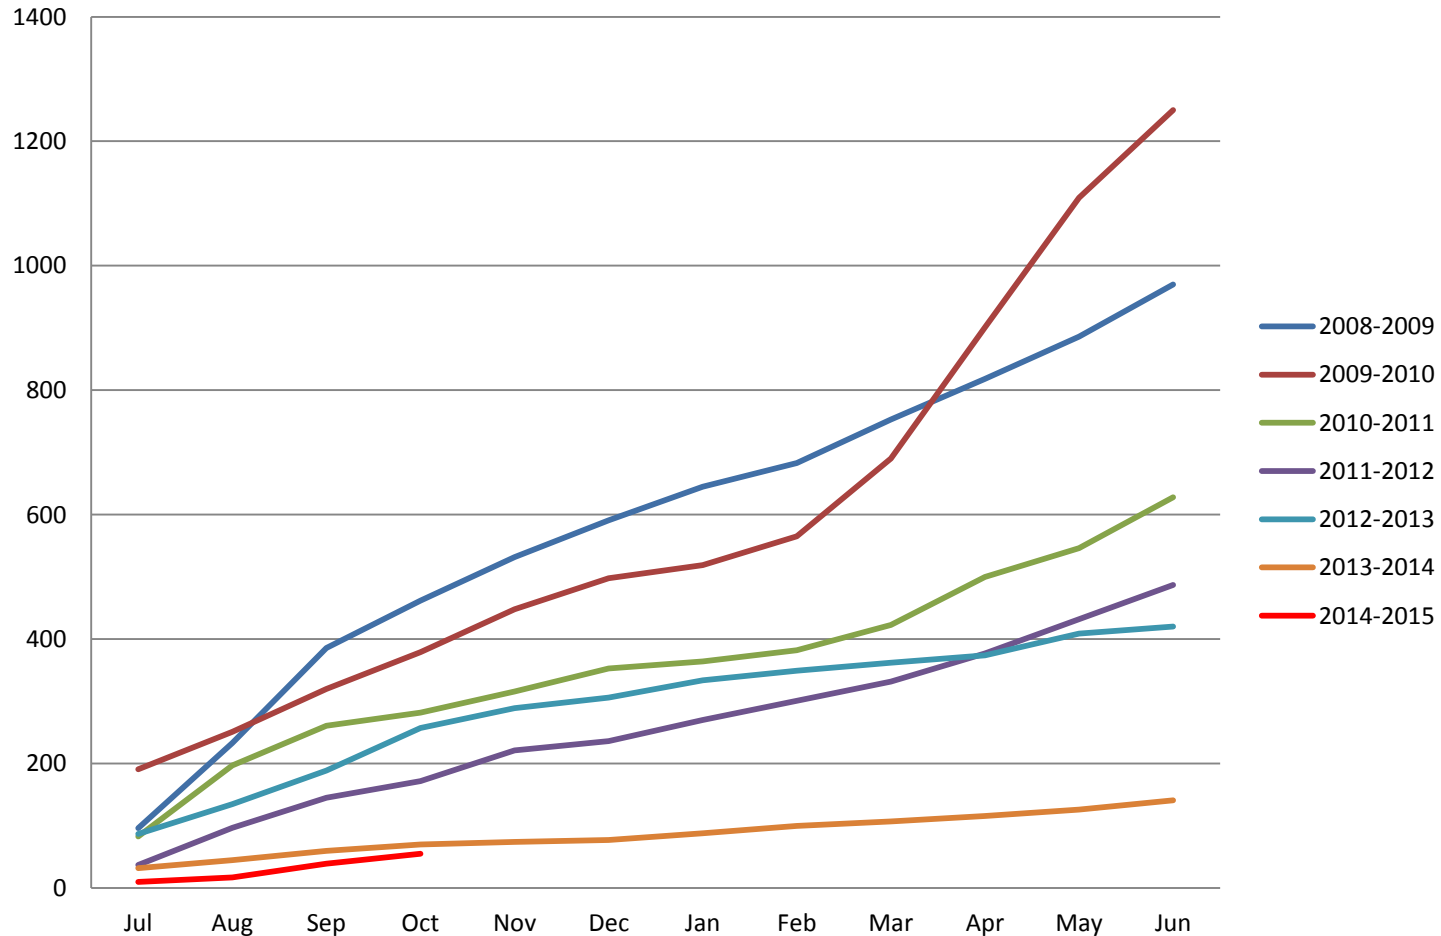

There will no longer be a need for reactive measures to retrospectively address environmental issues through enforcement notices.

Long term objective

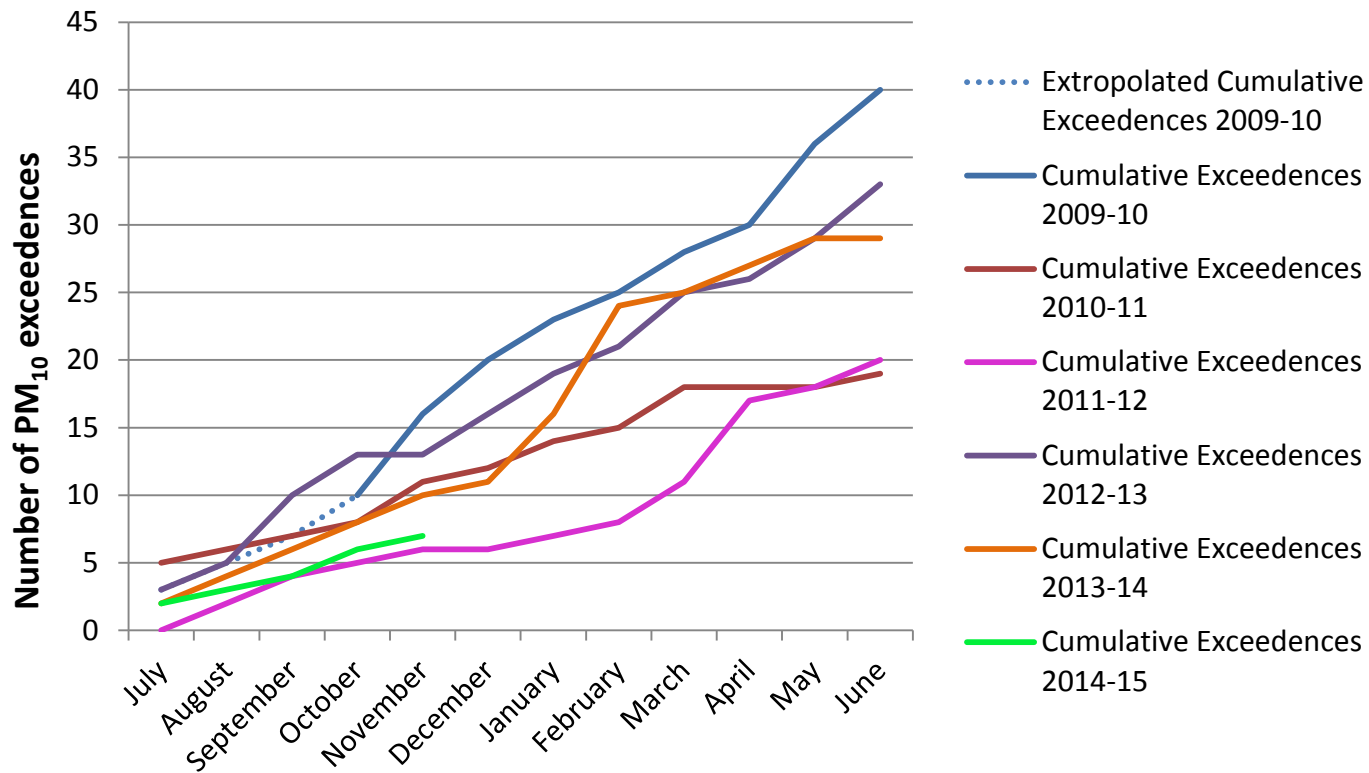

Brooklyn will remain a significant strategic priority for EPA until the following objectives are met:

- No more than five PM₁₀ exceedance a year are measured in Brooklyn
- Effective on-site management of Dust, Odour, Noise and all other industrial pollutants.
- Our co-regulators are driving further long-term improvements in amenity and the environment in the industrial precinct

Odour update

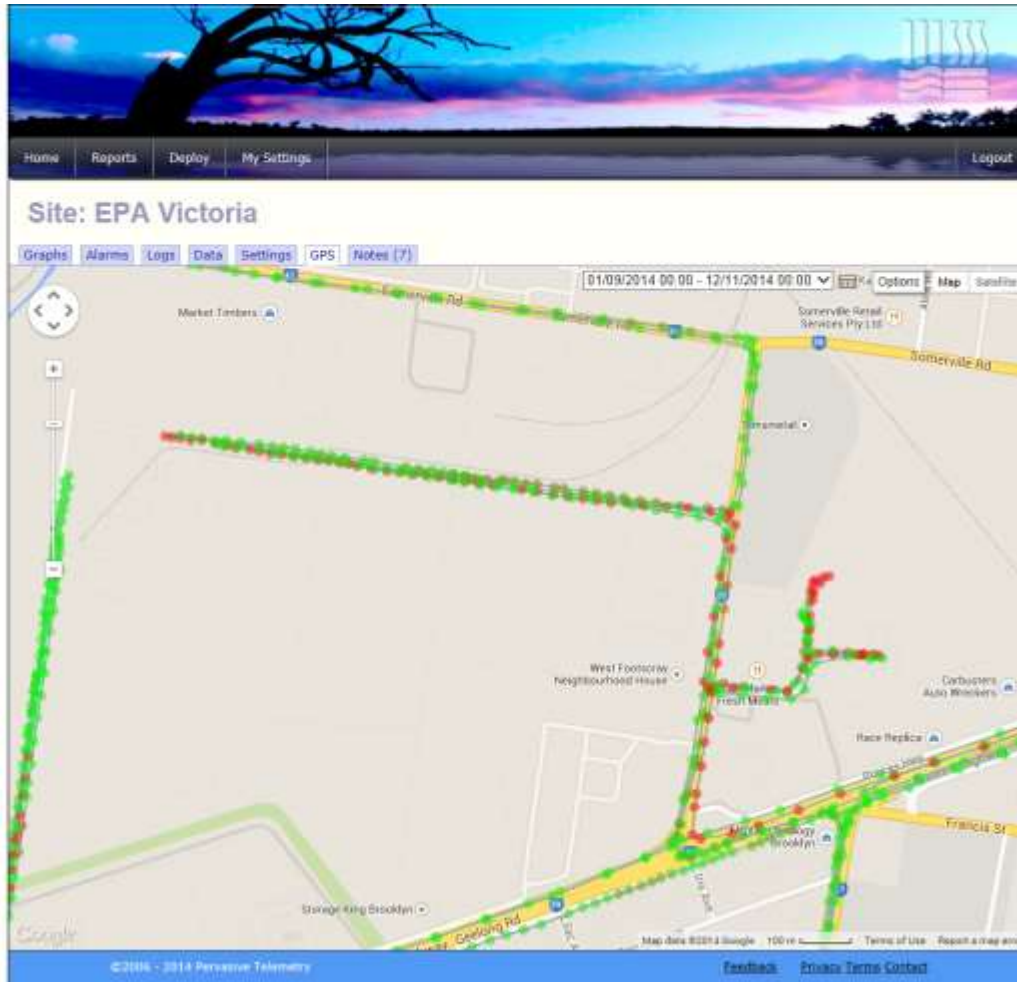

Air Quality Update

Seven exceedences recorded as of the 12th of November 2014
(2014-15 Financial Year)

Mobile Particle Investigation

Current remedial notices
