Response to Pollution Reports

FY- Accumulative Odour reports

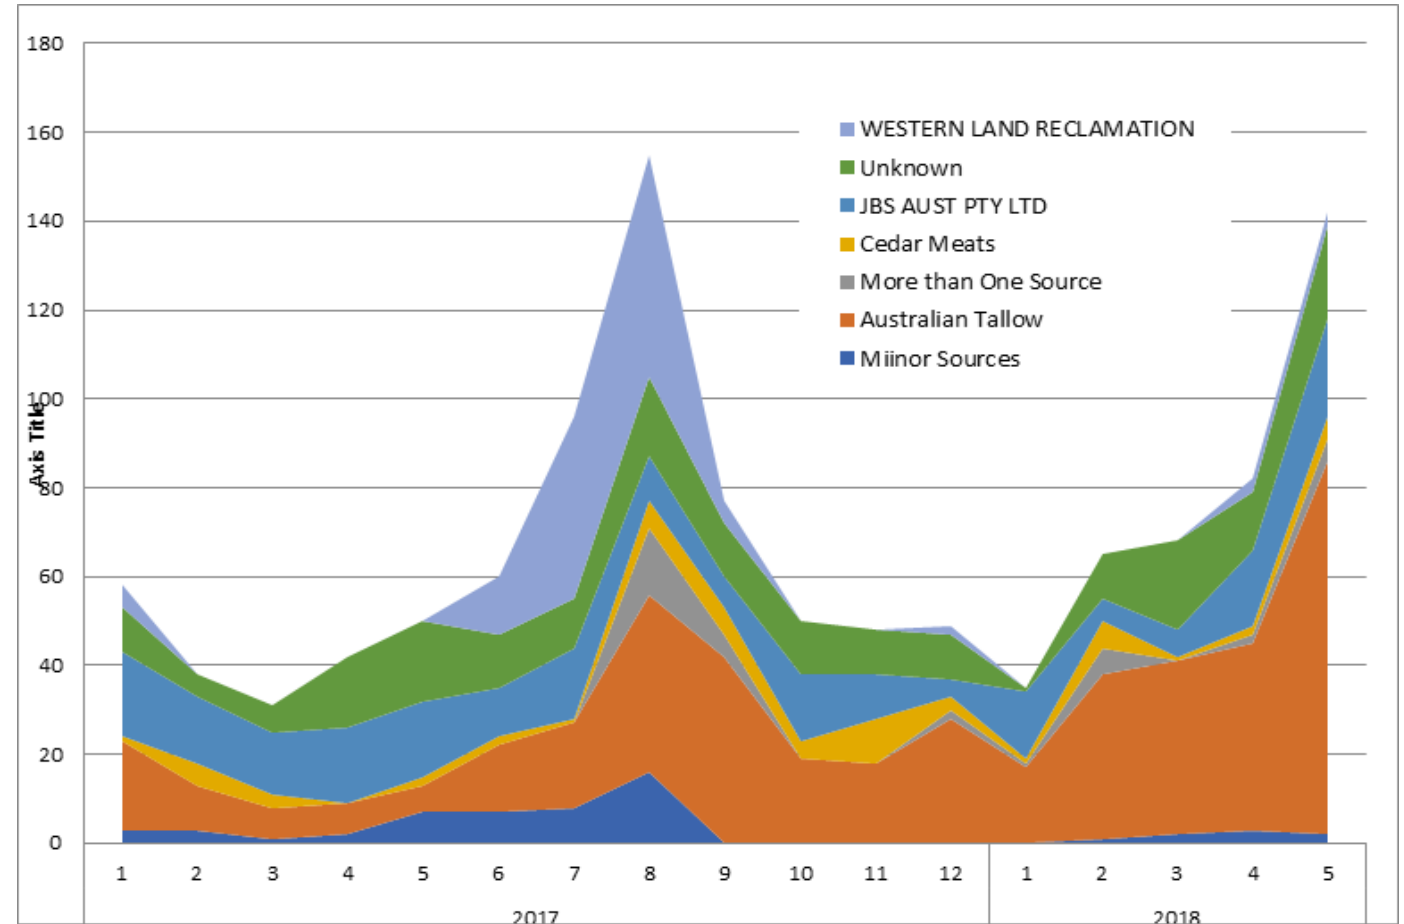

BROOKLYN Odour/Dust Reports 2015-2018

Analysis of Pollution Reports

- The reports have been provided as a service to industry
- Cross referenced reports with data and indicated the possible source of odour for each complaint based on:
 - Wind direction
 - Location
 - Date and time of the report
 - Description of the odour

Q Fever

- One diagnosis of Q fever
- Infection of humans may occur by Inhalation of the bacteria in air carrying dust contaminated by dried placental material
- Victorian doctors (and pathologists) have a statutory obligation under Section 127 of the *Public Health and Wellbeing Act 2008* to report in writing any confirmed cases of Q fever to the **Department of Health and Human Services**
- In the event of a cluster of confirmed cases, EPA may be required to assist DHHS if an EPA licensed facility abattoir or other scheduled premise is suspected of being the source of the outbreak

Thank You
